

*Rettangolare*

$$j \cdot \frac{1}{2} = 0 + j \cdot \frac{1}{2}$$

$$|c| = \sqrt{0^2 + \left(\frac{1}{2}\right)^2} = \frac{1}{2}$$

$$\theta = \operatorname{arctg}(0.5/0) \rightarrow \frac{\pi}{2}$$

*Esponenziale  
complessa*

$$\frac{1}{2} e^{j \cdot \frac{\pi}{2}} = c_{-1}$$
